HIRING EVENT

March 29, 2022

9:00am to 12:00pm and 3:00pm to 6:00pm

130 Arthrex Drive Pendleton, SC 29670

On-Site Interviews – Potential Same Day Job Offers

Welcome to Arthrex, a global medical device company and leader in new product development and medical education in orthopedics. With a corporate mission of Helping Surgeons Treat Their Patients Better™, Arthrex has pioneered the field of arthroscopy and develops more than 1,000 innovative products and procedures each year. Arthrex continues to experience unprecedented growth and demand for our products throughout the world; however, we remain a privately held company with a family business culture committed to delivering uncompromising quality to the health care professionals who use our products, and ultimately, the millions of patients whose lives we impact.

We invite you to learn more about Arthrex and the positive contributions we are making to medicine and the communities we serve.

Potential employment opportunities exist for:

Assembly Tech

Clean Room Operator

CNC Machine Operator

Finishing Tech

QC Inspection

Textile Tech

Qualifications and requirements include:

High School Diploma or equivalent required for all positions.

Produce quality medical instruments in a safe and effective manner to meet and exceed the customer's needs.

- **Assembly Tech**

- Set-up and operate a variety of hand-operated tools and light duty machines to manufacture product specified on work orders using engineering prints and standard work instructions.
- Performs tasks such as but not limited to buffing, filling, drilling, reaming, sandblasting, riveting and etching.
- Assembles the finished product to specifications with the use of measuring equipment, specialized hand tools and microscopes, making decisions in fitting and adjustment of parts or part substitutions within established guidelines to achieve the required specifications.

- **Clean Room Assembler**

- Operate in a cleanroom; ability to wear hair nets, facemasks, gowns, booties, gloves; cannot wear cosmetics.
- Perform suture hand assembly and/or packaging operations with strict attention to dimensional and particulate specifications.
- Comply to policies, procedures, and good manufacturing practices.
- Assemble, label and package medical devices.
- Load and orient unit devices into unit packages or automated equipment.
- Basic computer skills preferred.
- Ability to work independently to manufacture the product as instructed.

- **CNC Machine Operator**

- Direct CNC experience required.
- Ability to operate CNC machines, use different types of measuring tools and perform all aspects of line clearance.
- Maintain quality and production output.
- Operate various machines as needed. Multi axis Swiss lathes, Lathes, Milling machining centers, Grinders.

- **Finishing Tech**

- Clean, finish and debur products according to procedure.
- Knowledge of mechanical equipment, hand/eye coordination, detail oriented.
- Ability to debur, tumble, sandblast, polish and finish metals.
- Accurately key in time in SAP to reflect true time spent on jobs.

- **QC Inspector**

- Performs and documents dimensional inspections on inventory parts using engineering prints, Inspection procedures or work instructions.
- Selects products at specified stages in the production process, if applicable, and inspects products for variety of qualities, such as dimensions and functionality
- Records data, applying statistical quality control procedures.
- May perform, as needed, nondestructive tests on materials, parts, or products to measure performance, life, or material characteristics

- **Textile Tech**

- Set-up and operate a variety of hand tools and light duty textile machines to manufacture product specified on work order using engineering prints, standard work instructions and Inspection procedures.
- Manufacture the finished product to specifications with the use of measuring equipment, specialized hand tools and microscopes, making decisions in equipment
- Handle and measure appropriate chemical quantities using laboratory equipment such as graduated cylinders and digital scales; track usage for accurate inventory issuance.
- Works inside a controlled clean room environment for material finishing, including wearing clean room attire in accordance with ISO Class 7 controlled environment requirements.
